Education

Özyeğin University

Bachelor of Science in Electrical and Electronics Engineering; Minor in Computer Science

Expected June 2025

Istanbul, Turkey

Experience

NTT Data Business Solutions Turkey

Software Engineer (Project Student)

September 2024 – Present

Istanbul, Turkey

- Develop new features and maintain existing functionalities for BSH (Bosch Siemens Hausgeräte) software systems using .NET and Angular for modern applications, and ASP.NET for legacy systems.
- Design, query, and manage application data effectively using Microsoft SQL Server (MSSQL).
- Implement and manage CI/CD pipelines using GitHub Actions to automate testing and streamline application deployment processes.
- Contribute to the full software development lifecycle, including requirements analysis, design, implementation, testing, deployment, and maintenance within a client-focused IT solutions environment.

Simofun Oyun Teknolojileri

VR Unity Developer Intern

May 2024 – July 2024

Ankara, Turkey

- Enhanced visual fidelity while maintaining mobile performance targets by implementing a GPU-based particle system using compute shaders and mobile optimization techniques.
- Improved player immersion in a VR project by integrating a full-body avatar system featuring physics-based interactions.
- Significantly improved frame rates and overall user experience for VR applications by conducting performance analysis and optimizing bottlenecks using Unity Profiler and Oculus-specific tools.

Migros Ticaret A.Ş

Long Term Intern Backend Developer

May 2023 – May 2024

Istanbul, Turkey

- Delivered a proof-of-concept application to validate [e.g., a new microservice architecture] by developing components using AngularJS, NestJS, and a Python client simulator.
- Contributed to backend system stability and feature set by developing and maintaining microservices using NestJS.
- Supported agile team workflow and project delivery by actively participating in sprint planning, daily stand-ups, and collaborative problem-solving sessions.
- Enabled data-driven insights from internal survey systems by developing a visualization and reporting tool using HTML, CSS, and JavaScript.

Rekrom Optoelektronik

Software Engineer Intern {After 2 month} Junior Software Engineer

August 2022 – April 2023

Ankara, Turkey

- Contributed to the development of the company's Enterprise Resource Planning (ERP) software by implementing modules using Python-Django and PostgreSQL, improving operational efficiency.
- Facilitated virtual product testing and evaluation by creating realistic simulation environments using Unreal Engine.

Projects

Space Miner | Rust, Bevy

May 2024

- Developed a complete 2D space mining game featuring physics-based movement and particle effects using Rust and the Bevy game engine.

OCPP CSMS Framework | TypeScript, NestJS, AngularJS, MongoDB, RabbitMQ

January 2024

- Built a scalable Charge Station Management System capable of handling multiple concurrent OCPP connections and real-time status updates via WebSockets by implementing a microservices architecture using NestJS, RabbitMQ, MongoDB, and an AngularJS frontend.

- Enabled effective testing of the OCPP CSMS by developing an EV Charger Simulator implementing OCPP standards with a Tkinter GUI using Python.

- Streamlined the equipment/resource booking process for students and staff in the university's OpenFab area by developing a full-stack registration application using Python-Django for the backend and React for the frontend.

Technical Skills

Languages: Python, C#, C++, Java, Rust, HLSL, TypeScript, JavaScript, HTML/CSS, SQL

Frameworks/Technologies: .NET, ASP.NET, Angular, Unity, Unreal Engine, Bevy, Django, NestJS, React, Node.js, RabbitMQ

Databases: Microsoft SQL Server, PostgreSQL, MongoDB

Developer Tools: VS Code, Visual Studio, Git, GitHub Actions, Jira, Docker, Linux, Microsoft Azure

Leadership / Extracurricular

Ozyegin Game Dev Club

Spring 2021 – Present

Co-Founder, President

Ozyegin University

- Enhanced member engagement and skill development by initiating and organizing workshops, industry speaker events, and career summits focused on game development.
- Led an executive board of 10 members to successfully plan and execute weekly and monthly club activities and events through structured planning and delegation.
